

***RALEIGH IS BUILDING BICYCLES
TO TAKE ON THE WORLD.***

THE DIFFERENCE.

handlebars, horizontal forged micro-adjustable drop-outs for faster wheel changes, short reach aero-dynamic brakes for improved rigidity, and surer stops. Unique sealed bearing hubs and bottom bracket axle bearings increase reliability and performance by keeping out moisture and contaminants.

For a closer look at four serious contenders, look no further than your Raleigh® dealer.

Raleigh's custom bicycles feature wheel and component gruppas from two of the finest names in racing: TI Reynolds and Campagnolo.

COMPETITION

Tight frame geometry and 7 speed freewheel make it ideal for triathlons and road events.

SUPERCOURSE

Full chrome moly racing bicycle—a serious racing bicycle without a serious price tag.

GRAND PRIX

Lightweight double-butted chrome moly tubing and Raleigh's most affordable competition class component gruppas.

Raleigh. Official supplier of bicycles to the U.S.C.F. and the U.S. Cycling Team.

ING SHOULD BE A TEST OF DURANCE, NOT YOURS.

Wide flange sealed hubs.

Finally, it all has to be put together with quality and features like vertical drop outs, Quickstand, sealed bearing wide flange hubs and bottom brackets. Randonneur style alloy bars and cushioned handlebar grips make our Lightweight Touring bicycles the most comfortable, reliable, and best performing touring bicycles you can buy.

Cantilever brakes insure safe descents with heavy loads.

So whether you're out for short tours or century rides,

SR Randonneur alloy handlebar.

Dia-Compe 981-161 cantilever brakes.

Dual fork eyelets.

Forged vertical drop-outs.

27 x 1 3/8 wheels with Araya 16A (3) alloy rims.
